

# Alternative Screenings

Additional instruments and questionnaires for use with at-risk populations to ensure best possible outcomes

The Northpointe Suite can be customized with alternative screening instruments to supplement the standard COMPAS and COMPAS-R assessments to produce offense-specific information for specialized populations. Removing subjectivity and room for error from the vital decisions your staff members make every day is key to driving data-backed solutions and best next steps.

With alternative screenings, you gain access to over 25 nationally recognized tools relating to trauma, drug and alcohol use, history of violence, behavioral health, domestic violence, and sex offense cases to better understand backgrounds and pave pathways forward. These screenings save your team time, streamline internal decisions, and customize supervision strategies and case management plans.

## Key Features

Library of screening tools including Static 99R, ACUTE and STABLE-2007, DVSI-R, ODARA, TCU Drug Screen, and Opioid Supplement

Behavioral Health tools

Stages of Change and Motivation Questionnaires

Criminal Thinking Scales

Trauma, Suicide, and Mental Health Screenings

Robust integration capabilities

Results can be automated into a case management strategy

Evidence-based data considerations and ad hoc data extract capabilities

## With equivant Supervision, your agency can:

- Secure nationally recognized screening instruments and assessments that cover a broad spectrum of dynamic risk and need factors
- Make informed decisions based on evidence-based data and recommendations
- Mitigate risk by removing subjectivity from decisions, supervision strategies, and case management plans
- Keep individualized needs at the center of your supervision efforts
- Give time back to your staff by automating your processes
- Clearly communicate and outline case management and treatment plans to justice-involved individuals

**Better assessments mean better individualized plans to support effective supervision strategies that reduce recidivism and enhance the safety of communities.**
