

# Case Planning

Efficient, comprehensive case plans for every justice-involved individual

Effective, tailored case planning can reinforce behavior change, especially when plans are driven by an individual's assessed dynamic needs, stabilization factors, and motivation levels.

Customization and configuration are kept top-of-mind in the Northpointe Suite Case Planning solution. From pre-defined goals, tasks, and action steps to robust data collection capabilities such as referrals, dosage details, and completion codes, our Case Planning functionality provides users with an effective tool that defines next steps for clients and data analysis capabilities for agencies.

## Key Features

Generate case plans directly from our library of validated risk and need assessment and screening tools

Link client goals to their identified dynamic need and stabilization factors

Functionality that supports short- and long-term goals as well as action steps

Comprehensive data collection with measurable outcomes

Robust configuration and customization options

Seamless integration capabilities

E-signatures and case plan summaries

Integrated reminders and scheduling for the user and the client

With equivant Supervision, your agency can:

- Take advantage of dynamic case planning that allows for comprehensive management and oversight
- Integrate a library of assessments and client data all in one platform
- Save time and improve outcomes
- Make data-informed decisions and implement best next steps quickly and efficiently
- Better manage workload, scheduling, client caseloads, and more

**Create individualized case and treatment plans that save staff time and support client success, reduce recidivism, and create safer communities.**
