

# Data Interfaces

## Data from multiple sources for a comprehensive view of individuals' information

The data that lives in your system may be easily accessible to all staff members looking for client information. But what about the information that lives elsewhere – in other systems, possibly even other departments? In order to stay productive and focused, your team needs the powerful advantage of seamless, comprehensive data-sharing.

equivant Supervision's Northpointe Suite offers a robust set of interface and integration capabilities that make all-inclusive data exchange possible. Eliminate double data entries, cumbersome searches across platforms, and outdated procedures by integrating a single-source solution for every piece of data you need. Streamline your workflow by relying on a proven solution that delivers confidence, customization, and collected information at a glance.

### Key Features

Maintain real-time data connections

Built-in and documented options for quick and reliable data integration

Bring assessments, drug test results, and other outside data together into one system

Allow partner agencies to create solutions that work best for their specific needs

Ability to create new standardized data interfaces

Proven and tested data interfaces with decades of use and results

### With equivant Supervision, your agency can:

- Save time and streamline processes across departments and teams
- Create easily navigable information hubs for staff, partners, and justice-involved individuals
- Banish information silos and bridge data in a simplified, user-friendly platform
- Access and share data across solutions and agencies
- Rely on an experienced, practitioner-led team for implementation and support

**Bring data, processes, and partners together in one place to optimize systems and workflows.**
