

# Reporting

Mission-critical data at a glance for accurate, nuanced reporting that affects real time decisions

As your system gathers and stores information in a variety of locations, your team needs a quick, easy way to analyze, identify trends, and make decisions using all available data. From ad-hoc reports to pre-built templates, your agency deserves data on-demand.

Reporting through equivant Supervision's Northpointe Suite gives you the flexibility and confidence to structure and visualize your data in the ways it works for you. More so, you also have the ability to tailor permissions accordingly and integrate third-party information where it makes sense. Optimize your operations and make more strategic decisions with readily available data and reporting.

## Key Features

Customizable interfaces that proactively gather and showcase your most important information

Compiled database featuring key data sets from a variety of sources

Ad-hoc data extracts to pull a variety of information when you need it

User-friendly interfaces for easy navigation, extracting, downloading, and more

Risk reports, supervision level reports, case planning reports, and more

## With equivant Supervision, your agency can:

- Set your staff, administrators, and more up for ongoing success
- Mitigate risk by relying on data-informed decision making and practitioner-led support
- Save time across departments by offering mission-critical data at a glance
- Gain a comprehensive view of your operations – including strengths, weaknesses, and key opportunities

**Move forward with confidence and make quicker, more strategic decisions through comprehensive reporting.**
